

## **All I Want**

With a new believer's verve my fingers loose I chase the landscape of your body  
I'm spinning in my mind, I've got sugar in my eyes  
I forget, at least I try to put aside the truths we both briefly discussed  
See then in time I'm hypnotized You're moving like a river naked in perfection  
You guide me I'm a nervous new disciple who is losing his direction

CHORUS:

All I want is to be with you tonight/ All you want is to be with me  
All we want is to be we two tonight/ What's been shakin' is arresting me

We met at some vapid jolly function you sticking up an artist for the underdog who started out okay  
We smoked all of your cigarettes because I had none of my own you said isn't that typical  
I said whenever you're through could you give me a light?  
I was obviously joking see these politics of sexuality this is the fallacy this is not reality come on let's think  
about it  
On second thought I don't want to think about it

CHORUS
